

Xinke (Felix) Li

Quality Assurance Lead

(778) 996 - 9521 | 6915 Knight Street Vancouver, BC, V5P 2W6 | work.xinli525@gmail.com | [LinkedIn](#)

Quality Assurance Lead with multiple shipped titles at Electronic Arts, specializing in end-to-end test planning — from suite creation and maintenance to manual, automated, and data-driven testing. Experienced in cross-functional collaboration with developers and producers to define and align on test coverage, alongside managing and mentoring teams of 5–10 with direct upper management reporting. Passionate about shift-left QA and practical AI integration (LLMs) without sacrificing the signal of human testing. Proficient in Python, with working knowledge of HTML, CSS, Selenium, and Cypress.

WORK HISTORY

Associate Quality Designer @Electronic Arts Burnaby (Aug 2023 - Present)

- **Testing & Quality Ownership** Led project- and feature-level QA across 5+ AAA gaming titles (FIFA, FC series) including in-game testing portals; assessed risk exposure and managed data metrics to track progress and maintain stakeholder alignment.
- **LLM-Driven Test Automation** Identified test case creation as a bottleneck in the QA pipeline; architected and led an LLM-based initiative that cut suite creation time by 50%, unlocking 2 additional test cycles per release gate and meaningfully expanding overall coverage.
- **Shift-Left & Process Engineering** Partnered with dev teams to redesign the brief review and sign-off process, reducing post-sign-off feature changes by 20%; drove shift-left adoption through increased unit testing and co-designed telemetry hooks that enabled feature-specific automation.
- **Multi-Studio Team Leadership** Managed cross-functional QA teams of 5–10 across Romania, Colombia, Vancouver, and the US; owned capacity planning, sprint ceremonies, and executive reporting including test reports and data pipeline management.

Game Tester @KeyWordStudios (Aug2021 - Aug 2023)

- **Test Execution & Bug Management** Executed full test suites within release timelines, managing the complete bug lifecycle in JaaS; uncovered multiple edge-case defects through directed free testing and partnered with developers on root cause analysis to drive product quality improvements.
- **Platform Coverage & Dev Tools** Delivered testing coverage across Gen3, Gen4, and Gen5 consoles and streaming platforms; proficient in Perforce and console management tools including game building, installation, and hardware troubleshooting.

SKILLS

- | | |
|------------------------|----------------------------|
| • Python | • English (Native Level) |
| • Selenium and Cypress | • Mandarin (Native Level) |
| • html | • Cantonese (Native Level) |
| • CSS | • Japanese (JLPT N5) |

EDUCATION

Biology Undergraduate @University of British Columbia (Sept2014 - Dec2019)

Graduated with 3.8Gpa, specialized in trait expression and in heritability with focus on data analysis and model creation. Elective courses in computer science and data analysis for the scientific field.
